- 106 Technical Information
- 116 Panel Mounting

The pinnacle of design artistry and technical skill, the Penthouse Collection is home to our finest creations. Stylish lines and extraordinary skill come together to deliver the sleekest flush, screwless plates on the market. The design for this collection features a slimline, screwless flat plate with hidden clip-in fixings for a flush finish; an ideal complement to any interior.

PENTHOUSE

collection

Available in the following finishes:

- Polished brass
- Bright nickel
- Antique bronze
- Satin nickel
- Matt black
- White
- White-etched prime
- Dark antique bronze
- Burnished Brass
- Lacquered Satin Brass

Other finishes available – please see page 101 for further details

Socket outlets

The Penthouse Collection's range of switch plates uses a hidden clip-in style, attaching securely to the rear mounted grid. Earthing the front plate is ensured by fitting a scraping earth to the adjustable grid. Available in the range of finishes shown on page 100.

13Amp socket outlets

Description	Single	Twin
Box Flush (metal)	1702	1703

Switch/Modular plates

With a plate profile of 3.5mm the Penthouse Collection sets the standard for a truly flush finish. The Penthouse Collection's range of switch plates uses a hidden clip-in fixing that attaches securely to the rear mounted grid. Earthing the front plate is ensured by fitting a scraping earth to the adjustable grid.

Rocker switch plates & grids

Plate	P401	P402	P403	P404
Grid	G401	G402	G403	G404
Box Flush (metal)	1702	1702	1703	1703

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are available in red with white, black or red trim, or green with white or black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

Rocker Switches

Unit	Switch	Switch	Switch	Switch	Switch	Switch	Switch

*Key switches are supplied with one key.

Modular interiors outlets

The range has been cleverly designed to allow bespoke outlet arrangement without the need for a specially designed custom unit. For example Data, Voice and AV outlets can be matched together using our existing grids and switch plates.

Note: All toggles 20Amp unless stated otherwise

*96 rated at 6Amp **Bell push are rated at 250V 4A AC

Dimmers

As with the rockers, toggles and bell pushes, we have applied the same flawless 3.5mm, flush fitting design criteria. Earthing the front plate is ensured by fitting a scraping earth to the adjustable grid.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers.

Dimmer plates

Bespoke plates

Getting the details right should be enjoyable and easy. That's why we invite you to take advantage of our bespoke service. You will be able to select your style, colour, finish and configuration from a wide variety of options. You can choose from a range of sizes and customise your plates to contain a vast array of interiors, including switches, sockets, multimedia and data outlets. Please contact us and involve us in your creative process, and we'll work with you to design every item to meet your individual requirements.

Standard size plates

We are able to supply standard size plates with bespoke configuration. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

Single plate with special configuration
86mm x 86mm

Twin plate with special configuration
146mm x 86mm

Special size plates

We also offer special size plates in the following sizes. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

3 Gang Horizontal Plate
227mm x 86mm

Box 8467 210mm x 75mm x 45mm

3 Gang Horizontal Plate
227mm x 86mm

Box 8468 210mm x 75mm x 45mm

4 Gang Plate
146mm x 182mm

Box 8463 270mm x 165mm x 45mm

6 Gang Horizontal Plate
422mm x 86mm

Box 8462 405mm x 75mm x 45mm

The Infinity Collection presents a range of sophisticated, slimline accessories. Our craftsmen have precision engineered a simple, screwless design with a neat wall-mounting grid enables plates and interiors to be clipped into place after decorating, for a clean, high quality finish. The design for this collection features a screwless flat plate with hidden clip-in fixings for a flush finish; an ideal complement to any interior.

INFINITY

collection

Available in the following finishes:

- Polished brass
- Antique bronze
- Satin silver
- Super mirror stainless
- Satin stainless steel
- Matt black
- White
- Dark antique bronze
- Burnished Brass
- Lacquered Satin Brass

Other finishes available – please see page 101 for further details

Socket outlets

All 13Amp socket interiors are moulded from polycarbonate. Switched socket outlets have double insulated rockers. Red interiors are available for special applications. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Non-standard and isolated earth sockets and switched sockets are available on request. 2 and 5Amp sockets are designed to BS546 and have polycarbonate moulded interiors. Available in the range of finishes shown on page 100.

* Box depths are for guidance only as final depth is dependant on the minimum bend radius of the cables used. The installer must be satisfied that the depth of box is sufficient before ordering.

** The installer/specifier must ensure that the product is compatible with installed cables and any data requirements etc before ordering.

Fused connection units & cable outlets

The units have a retained fuse carrier that is not removed during fuse replacement. On switched versions, the double pole switch has 3mm contact gaps for isolation. Cable outlets have a bushed hole, a cord clamp and 3 way terminal block, suitable for up to 1.5mm flexible cable. See page 106 for box details. Available in the range of finishes shown on page 100.

Traditional, understated design and skilled craftsmanship are the signatures of the Classic Collection. Each stylish accessory features a sleek, flat plate and is made with solid brass, stainless steel or aluminium for a superior, dependable quality. The result is a high-quality, low-profile finish that is the hallmark of Wandsworth.

collection

CLASSIC COLLECTION

- Available in the following finishes:
- Polished brass
 - Antique bronze
 - Satin silver
 - Super mirror stainless
 - Satin stainless steel
 - Matt black
 - White
 - Dark antique bronze
 - Burnished Brass
 - Lacquered Satin Brass

Other finishes available – please see page 101 for further details

Socket outlets

Socket outlets are based on the same modular principle as the matching grid switch system. They can be installed and aligned separately as the socket interiors are mounted on an adjustable grid within the box. Switched socket outlets have double insulated rockers. Red and Blue interiors are available for special applications e.g. essential supply, etc. Red neons are available on switched sockets. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Available in the range of finishes shown on page 100.

Integrated USB

The combined USB socket is ideal for charging all smart devices, such as iPhones, iPads, Tablets, Mobile phones, cameras and more and is an ideal solution for hotels, providing highly sought after charging points, particularly useful for international guests with the universal nature of USB charging.

Switch/Modular plates

Flush cover plates are manufactured from aluminium, brass or stainless steel and have a 7mm overlap. They are 2.0mm thick (1.5mm for stainless steel plates), with gently bevelled edges and rounded corners. Earthing of the front plate is achieved through a flying earth lead or terminal attached to the grid and through the front plate fixing screws.

Available in the range of finishes shown on page 100. All Classic switches will fit a minimum depth back box of 35mm. Boxes to BS4662. See page 106 for box dimensions.

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are available in red with white, black or red trim, or green with white or black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

Toggle/Bell push switch

Plate/Grid Assembly	481	482
Box Flush (metal)	1715	1716

Dimmers

Rotary dimmers, suitable for use with tungsten or LED lighting, are push on/push off switch dimmers which act at any pre-selected brightness setting. They have 2 way switching that may be used with a normal 2 way switch elsewhere. Larger gang dimmer units are available to special order and quotation.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers.

* Box depths are for guidance only as final depth is dependant on the minimum bend radius of the cables used. The installer must be satisfied that the depth of box is sufficient before ordering.

** The installer/specifier must ensure that the product is compatible with installed cables and any data requirements etc before ordering.

Double pole switch with neon

Double pole switches with neon are available as twin or single gang units complete with amber neon indicator. For plate/switch finish combinations, please see page 100. See page 106 for box dimensions. 45Amp units are typically used as cooker switches.

45Amp double pole switch

Fan isolator unit

Fan isolator unit	2990
Box Flush (metal)	1702

The 3 pole 10Amp Fan isolator units complies to BSEN60947-2.

Fused connection units & cable outlets

Fused connection units are grid mounted offering alignment and depth adjustment which enables the fused connector unit to be installed and the cover plate fixed after decoration work has been completed. The units have a retained fuse carrier that is not removed during fuse replacement. On switched versions, the double pole switch has 3mm contact gaps for isolation. Cable outlets have a bushed hole, a cord clamp and 3 way terminal block, suitable for up to 1.5mm flexible cable. See page 106 for box details. Available in the range of finishes shown on page 100.

Bespoke plates

Getting the details right should be enjoyable and easy. That's why we invite you to take advantage of our bespoke service. You will be able to select your style, colour, finish and configuration from a wide variety of options. You can choose from a range of sizes and customise your plates to contain a vast array of interiors, including switches, sockets, multimedia and data outlets. Please contact us and involve us in your creative process, and we'll work with you to design every item to meet your individual requirements.

Standard size plates

We are able to supply standard size plates with bespoke configuration. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

Single plate with special configuration 86mm x 86mm

Twin plate with special configuration 86mm x 146mm

Special size plates

We also offer special size plates in the following sizes. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

3 Gang Horizontal Plate 227mm x 86mm

Box 8467 210mm x 75mm x 45mm

3 Gang Horizontal Plate 227mm x 86mm

Box 8468 210mm x 75mm x 45mm

4 Gang Plate 146mm x 182mm

Box 8465 135mm x 165mm x 45mm

6 Gang Vertical Plate 146mm x 272mm

Box 8464 135mm x 255mm x 45mm

4 Gang Horizontal Plate 287mm x 86mm

Box 8466 270mm x 75mm x 45mm

8 Gang Plate 287mm x 182mm

Box 8463 270mm x 165mm x 45mm

6 Gang Horizontal Plate 422mm x 86mm

Box 8462 405mm x 75mm x 45mm

The traditional, understated design and skilled craftsmanship of the Classic Collection but with a square edge design. Featuring low profile, flush fitting plates and available in a huge variety of standard as well as bespoke finishes, the Classic Square Edged collection brings Wandsworth's hallmark quality to any interior design scheme.

Socket outlets

Socket outlets are based on the same modular principle as the matching grid switch system. They can be installed and aligned separately as the socket interiors are mounted on an adjustable grid within the box. Switched socket outlets have double insulated rockers. Red and Blue interiors are available for special applications e.g. essential supply, etc. Red neons are available on switched sockets. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Available in the range of finishes shown on page 100.

Switch/Modular plates

Flush cover plates are manufactured from aluminium, brass or stainless steel and have a 7mm overlap. They are 2.0mm thick (1.5mm for stainless steel plates), with gently bevelled edges and rounded corners. Earthing of the front plate is achieved through a flying earth lead or terminal attached to the grid and through the front plate fixing screws.

Available in the range of finishes shown on page 100. All Classic switches will fit a minimum depth back box of 35mm. Boxes to BS4662. See page 106 for box dimensions.

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are available in red with white, black or red trim, or green with white or black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

Rocker Switches

Unit	Switch	Switch	Switch	Switch	Switch	Switch	Switch

*Key switches are supplied with one key.

Modular interiors outlets

The range has been cleverly designed to allow bespoke outlet arrangement without the need for a specially designed custom unit. For example, Data, Voice and AV outlets can be matched together using our existing grids and switch plates.

Box Flush (metal)	1715	1716

Dimmers

Rotary dimmers, suitable for use with tungsten or LED lighting, are push on/push off switch dimmers which act at any pre-selected brightness setting. They have 2 way switching that may be used with a normal 2 way switch elsewhere. Larger gang dimmer units are available to special order and quotation.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers.

* Box depths are for guidance only as final depth is dependant on the minimum bend radius of the cables used. The installer must be satisfied that the depth of box is sufficient before ordering.

** The installer/specifier must ensure that the product is compatible with installed cables and any data requirements etc before ordering.

Double pole switch with neon

Double pole cooker switches with neon are available as twin or single gang units complete with amber neon indicator. For plate/switch finish combinations, please see page 100. See page 106 for box dimensions. 45Amp units are typically used as cooker switches.

The 3 pole 10Amp Fan isolator units complies to BSEN60947-2.

Fused connection units & cable outlets

Fused connection units are grid mounted offering alignment and depth adjustment which enables the fused connector unit to be installed and the cover plate fixed after decoration work has been completed. The units have a retained fuse carrier that is not removed during fuse replacement. On switched versions, the double pole switch has 3mm contact gaps for isolation. Cable outlets have a bushed hole, a cord clamp and 3 way terminal block, suitable for up to 1.5mm flexible cable. See page 106 for box details. Available in the range of finishes shown on page 100.

Bespoke plates

Getting the details right should be enjoyable and easy. That's why we invite you to take advantage of our bespoke service. You will be able to select your style, colour, finish and configuration from a wide variety of options. You can choose from a range of sizes and customise your plates to contain a vast array of interiors, including switches, sockets, multimedia and data outlets. Please contact us and involve us in your creative process, and we'll work with you to design every item to meet your individual requirements.

Standard size plates

We are able to supply standard size plates with bespoke configuration. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

Single plate with special configuration
86mm x 86mm

Twin plate with special configuration
86mm x 146mm

Special size plates

We also offer special size plates in the following sizes. The examples below show typical interior configuration. Please call us to discuss your individual requirements:

3 Gang Horizontal Plate
227mm x 86mm

Box 8467 210mm x 75mm x 45mm

3 Gang Horizontal Plate
227mm x 86mm

Box 8468 210mm x 75mm x 45mm

4 Gang Plate
146mm x 182mm

Box 8465
135mm x 165mm x 45mm

6 Gang Vertical Plate
146mm x 272mm

Box 8464
135mm x 255mm x 45mm

4 Gang Horizontal Plate
287mm x 86mm

Box 8466 270mm x 75mm x 45mm

8 Gang Plate
287mm x 182mm

Box 8463 270mm x 165mm x 45mm

6 Gang Horizontal Plate
422mm x 86mm

Box 8462 405mm x 75mm x 45mm

Bringing together the period elegance of three unique historical eras, the Heritage Collection presents a line of accessories with Victorian, Adam and Georgian detailing. Distinctive, flawlessly executed pattern work reflects each period: the Victorian range is characterised by a stepped edge; beaded edging reflects the Adam era; and a rope edge conveys the spirit of the Georgian age.

HERITAGE

collection

GEORGIAN

VICTORIAN

Available in the following finishes:

- Polished brass
- Antique brass
- Antique bronze
- Dark antique bronze

Other finishes available – please see page 101 for further details

Socket outlets

Socket outlets are based on the same modular principal as the matching grid switch system. They can be installed and aligned separately as the socket interiors are mounted on an adjustable grid within the box. Switched socket outlets have double insulated rockers. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Available in the range of finishes shown on page 100.

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are available in red with white, black or red trim, or green with white or black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

*96 rated at 6Amp **Bell push rated at 4Amp.

Dimmers

Rotary dimmers, suitable for use with tungsten or LED lighting are push on/push off switch dimmers which act at any pre-selected brightness setting. They have 2 way switching that may be used with a normal 2 way switch elsewhere.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers.

With individual interior design expression in mind, we have combined subtle elegance, ingenuity and quality craftsmanship to create the Crystal Collection. Wall treatments are clearly visible through our transparent plates, and yet they are protected by the durable, scratch-resistant acrylic. The result is an understated look that will enhance and protect your unique design style for years to come. The design features an adjustable fixing grid, mounted within the back box, so the switches – in polished brass, antique bronze, bright nickel or satin nickel - can be wired and connected without the cover plate. Once the decorating is complete, cover plates can then be fitted.

CRYSTAL

collection

CRYSTAL COLLECTION

Available in the following finishes:

- Polished brass
- Antique bronze
- Bright nickel
- Satin nickel

For more information please contact our customer services team by email at sales@wandsworthgroup.com or by telephone on 01483 713400

Socket outlets

The plates in the Crystal Collection are manufactured from hard-wearing, scratch-resistant transparent acrylic material. The line includes 2amp, 5amp and 13amp sockets which can be finished in polished brass, antique bronze, bright nickel, and satin nickel. Unswitched socket outlets for 2amp and 5amp are available in black and white finish. 13amp single or twin socket outlets come with matching rocker switches.

* Due to the design, it is not possible to fit two units adjacent to each other in the following plates/grids: P202, G492.

DIMENSIONS

collection

We know that you like to think outside the box. That's why our engineers and craftsmen collaborated to produce the **Dimensions Collection**. These circular plates make a unique statement, symbolising creativity and breaking with wiring accessory design conventions. They are not only iconic but also technically superior, resulting in a line of accessories that will enhance any interior and design style.

Available in the following finishes:

- Polished brass
- Antique bronze
- Satin silver
- Super mirror stainless
- Satin stainless steel
- Matt black
- White
- Dark antique bronze
- Burnished Brass
- Lacquered Satin Brass

Other finishes available – please see page 101 for further details

Socket outlets

Socket outlets are based on the same modular principle as the matching grid switch system. They can be installed and aligned separately as the socket interiors are mounted on an adjustable grid within the box. Switched socket outlets have double insulated rockers. Red and Blue interiors are available for special applications e.g. essential supply, etc. Red neons are available on switched sockets. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. Available in the range of finishes shown on page 100.

13Amp socket outlets

Plate	P1074
Rear entry	A374
Box Flush (metal)	1702

To order plug please use part number 40. Plugs available in White (w), Black (B) and Red (R).

Switch/Modular plates

Flush cover plates are manufactured from aluminium, brass or stainless steel and have a 7mm overlap. They are 2.0mm thick (1.5mm for stainless steel plates), with gently bevelled edges and rounded corners. Earthing of the front plate is achieved through a flying earth lead or terminal attached to the grid and through the front plate fixing screws.

Available in the range of finishes shown on page 100. Switches will fit a minimum depth back box of 35mm. Boxes to BS4662. See page 106 for box dimensions.

Switch/Modular

Plate	P1001	P1002
Grid	G201	G202
Box Flush (metal)	1702	1702

Switch/Modular interiors

Rocker switches are manufactured from brass, aluminium or plastic, finished to either complement or match the cover plates. Neons are red with red trim or green with black trim. Key switches are white or black. Red interiors are available for special applications such as essential supply, etc. Alternative colour combinations can be supplied to order. Due to the grid mounting nature of the product range it is possible to mix any combination of plate finish with interior finish. It is recommended that samples are viewed before specifying. All switches are rated at 250V 20Amps except cat No. 15 & 17 which are rated at 6Amp.

Unit	Switch	Switch	Switch	Switch	Switch	Switch	Switch

*Key switches are supplied with one key.

Modular interiors outlets

The range has been cleverly designed to allow bespoke outlet arrangement without the need for a specially designed custom unit. For example Data, Voice and AV outlets can be matched together using our existing grids and switch plates.

* Due to the design, it is not possible to fit two units adjacent to each other in the following plates/grids: P1002, G1002.

Dimmers

Rotary dimmers, suitable for use with tungsten lighting, are push on/push off switch dimmers which act at any pre-selected brightness setting. They have 2 way switching that may be used with a normal 2 way switch elsewhere. Larger gang dimmer units are available to special order and quotation.

Note: Single section plates should not exceed 500 watts tungsten dimming load. Twin section plates should not exceed 1000 watts tungsten dimming load. Failure to comply with this may result in overheating of dimmer modules. Note that transformers supplying low voltage lamps should be dimmable electronic transformers.

Note: Toggle switches are not available to match the following plate finishes: PDB (suggest PB toggles are used for matching).

LB (suggest AB toggles are used for contrast), QS, W, CW (suggest SBC toggles are used for contrast).

All toggles 20Amp unless stated otherwise.

*96 rated at 6Amp. **Bell push rated at 4Amp.

Finishes

Polished brass (PB)
Our highly polished, lustrous brass finish will complement the most sophisticated room.

Light bronze* (LB)
A warm, elegant bronze effect, bringing a gentle, understated hint of class to your room design.

Bright nickel (BN)
Designed to suit contemporary and traditional interiors alike.

Antique Silver* (ASI)
Delivers a style that is at home in both contemporary and classic interior schemes.

Polished desert brass (PDB)
For a more subtle polished brass finish and an understated elegance for your room design.

Antique copper* (AC)
With a luxurious antique finish, antique copper combines both warmth and classic styling, ideal for any room.

Antique bronze* (AB)
The antique bronze finish is designed to enhance the historic period elegance of your setting.

Satin silver (SL)
This finely grained finish has been carefully designed to suit contemporary settings.

Super mirror stainless (SMS)
Hand polished for a super mirror effect and an ultra modern finish.

Satin stainless steel (SS)
Functional, stylish contemporary design.

Satin desert brass (SDB)
A timelessly elegant satin brass finish, blending the classic and the contemporary for a stunning effect.

Desert gold (DG)
Warmth and elegance combine in our beautiful desert gold finish.

Dark Antique Bronze (DAB)
Deep and rich, dark bronze brings a powerful elegance to an interior setting.

Satin nickel (SN3)
This gentle, brushed effect brings a chic, timeless style to any room.

Matt black (MB)
Simple and stylish, matt black lends understated class to your interior design scheme.

White (W)
A timeless yet contemporary finish to suit all settings and design styles.

White etched prime (WEP)**
Primed for paint finishing.

Burnished Brass (BB)
A beautiful lightly aged brass that brings character and sophistication to your interior. This finish is treasured for its long-lasting timelessness.

Lacquered Satin Brass (SB4)
Delicate brushing and lacquered brass are combined to give enduring elegance to any interior.

*Please note: The antique and light bronze finishes will vary due to the hand-finishing involved in the manufacturing process. ** Complete white etched units will be supplied with white interiors as standard.

This content is correct at the time of printing: ● Stock finishes ○ Lead time to be confirmed at time of ordering

Note: As standard, interiors will be supplied in the colour listed in the table above. i.e. a Polished Brass switch (10/PB) will come with a black surround as standard. If a white trim is required please add an additional suffix, e.g. 10/PB/W.

45Amp double pole cooker switches are not available to match the following plate finishes: DG, LB, PDB, QS & SDB. The units will be supplied with a Polished Brass (PB) switch to complement DG, PDB & SDB plates and a Black (B) switch to complement LB & QS plates.

Fan Isolator switches are not available to match the following plate finishes: AB, AC, AS, ASI, BN1, DG, LB, PDB, QS, SDB & SN3. All these plate finishes will be supplied with a Black switch. PDB finished plates will be supplied with a PB switch for a contrast.

Lockable enclosures

A lockable enclosure suitable for use in shopping precincts or other areas where restricted use is required. The hinged lid is finished in stainless steel. Each unit is supplied with two internal plates to accept 1 or 2 gang accessories from our Classic Collection. Accessories must be ordered separately with their respective front plates and grids.

Top cover overall: 186 wide x 150 high.

Box 166 wide x 130 high x 50 deep.

Flush, wall fitting only.

Lockable enclosure

Lockable Unit (supplied without Socket outlet)	396
Spare key set	399

Mains voltage indicators

The 240 volt indicators are suitable for use as warning lights for dispensary alarms, remote lights connected to security cupboards for controlled drugs and 'room engaged' signs. Cover plate finishes are stainless steel (SS). Red lenses are supplied as standard. Alternative replacement lenses, reference QD337, are available in green (GR), blue (BL), amber (A) and clear (CL). See page 106 for box dimensions.

S2 = 1.5mm steel

SWITCH INTERIORS

All the switches from our Penthouse, Infinity, Classic, Heritage, Crystal and Dimensions Collections – also known as Series 2 switches (Patent 2185632).

The switch body is a glass reinforced polyester moulding. The rockers are manufactured from brass or aluminium finished to either complement or match the cover plate finish. Brass terminals are pillar screw type with silver switch contacts and 3mm contact gap. Angled terminal screws make connection easier.

Wandsworth supply rotary dimmers suitable for both mains dimming and 1-10V operation. In general trailing edge dimming is more suitable for modern LED's, though there are exceptions. All of our dimmers can be used with a normal on/off switch as a secondary, or our ROO, which is designed to give on/off functionality whilst retaining the outward appearance of a rotary switch.

MAINS DIMMING

Your RTD120 intelligent dimmer switch is suitable for 1-way or 2-way lighting circuits. It has a push on/push off action to switch and a rotary action to dim. There are 3 screw terminals per module.

1-Way Circuits

In 1-way lighting circuits each light is controlled by one switch. Your dimmer switch should replace this switch. See Figure 1. Remove your old switch and copy the wiring configuration for your dimmer switch. Connect wires either way round to the 'C' terminal and one of the 'L' terminals. The other 'L' terminal is not used in a 1-way circuit.

Fig 1. Using a 1 or 2-way dimmer switch

2-Way Circuits

2-way lighting circuits have two switches turning the same lights on and off from 2 different locations (eg. at the top and bottom of the stairs). You must only replace one of these switches with a dimmer switch or the lights will flicker. See Figures 2 and 3 which show typical 2-way circuits. Remove your old switch and copy the wiring configuration for the dimmer.

Fig 2. Using a 2-way dimmer switch. Dimmer must replace only one of the 2-way switches

The wire(s) fitted in the "common" terminal of the old switch should be fitted into the "C" terminal of the dimmer switch. The wires fitted into the other two terminals of the old switch should be fitted either way round into terminals "L1" and "L2" of the dimmer switch.

Fig 3. Using a 2-way dimmer switch. Dimmer must replace only one of the 2-way switches

Intermediate Switch Circuits

Intermediate lighting circuits have three switches turning the same lights on and off from three different locations (e.g. Top and bottom of a stairs (2-way) but with a third switch on a landing half way up the stairs). You must only replace one of the two-way switches with a dimmer switch. See Figure 4 which shows typical intermediate circuits. Remove your old switch and copy the wiring configuration for your dimmer switch. The wire(s) fitted in the "common" terminal of the old switch should be fitted into the "C" terminal of the dimmer switch. The wires fitted into the other two terminals of the old switch should be fitted either way round into terminals "L1" and "L2" of the dimmer switch.

Multi-gang Dimmer Switches

To fit 2 gang (or 3 or 4 gang) dimmer switches treat each group of terminals at the back of the unit as a separate dimmer switch wiring them into the lighting circuits as described above. If required, one terminal from each dimmer module may be joined together with a short length of wire to copy the wiring configuration of the old switch.

Note: If the incorrect type of mains dimmer switch is used, you may experience buzzing or flickering. Please ensure the correct type of dimmer is chosen for your specific light source.

Fig 4. Using an intermediate switch.
Dimmer must replace only one of the 2-way switches

ANALOGUE (1-10V) DIMMING

RAD – Rotary Analogue Dimmer

In 1-way lighting circuits the ballast is controlled by one switch. Your dimmer switch replaces this switch. Your push-on/push-off dimmer switch has the advantage that it can be switched on and off with a push action, while keeping the lighting at the level you have chosen. Remove your old switch and copy the wiring configuration for the dimmer switch. The wires from your old switch can be connected either way round to the 'C' and 'L1' terminals of the dimmer switch. There is a spare terminal (L2) that you will not need to use for a 1-way circuit.

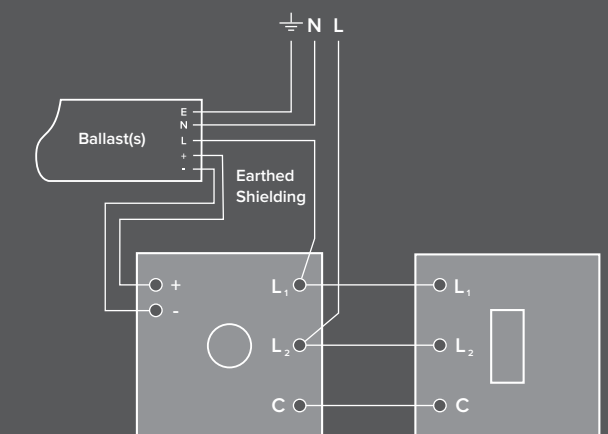

2-way lighting circuits have 2 switches turning the same light or lights on and off from 2 different locations (e.g. at the top and bottom of the stairs). You must only replace one of these switches with a dimmer switch or the lights will flicker. Two typical 2-way circuits are shown below.

Remove your old switch and copy the wiring configuration for your dimmer switch. The wire(s) fitted in the 'common' terminal of the old switch should be fitted into the 'C' terminal of the dimmer switch. The wires fitted into the other 2 terminals of the old switch should be fitted either way round into terminals 'L1' and 'L2' of the dimmer switch.

Note: Please remember that 1-10V switching w/llrequire two additional cores for the 1-10V signal.

Dimmer must replace only one of the 2-way switches

Dimmer must replace only one of the 2-way switches

ROO (ROTARY ON/OFF SWITCHES)

This switch is designed to switch mains voltage lighting loads. It can be used as a simple switch on a non-dimming circuit, or it can be used as a secondary (on/off only) switch with our rotary dimming modules.

Note: This unit is rated for a 6Amp maximum load.

Fig 1. Example wiring 1-way

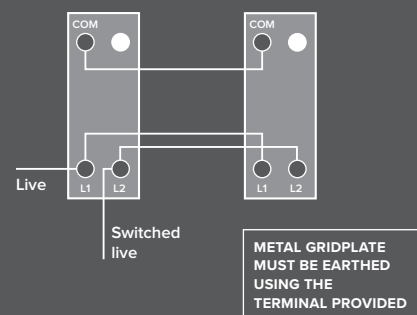

Fig 2. Example wiring 2-way

SOCKET OUTLETS

2Amp & 5Amp

2Amp and 5Amp socket outlets are designed to BS 546.

13Amp

Switched socket outlets have double insulated rockers. All units will fit metal boxes to BS4662 with a minimum depth of 35mm. All 13Amp socket outlets comply with BS1363. Independent test certificate are held as follows:

Single unswitched socket A12123	} Nemko test certificate no. C14/46409
Single unswitched socket 13270	
Single switched socket A378	
Twin switched socket A354	

Non-standard socket outlets 240v 13Amp

For use where a non-interchangeable facility is required, such as mixed voltages in computer installations. Non-standard socket outlets are also available with an isolated earth. Non-standard socket outlets are rated at 240V 13Amps AC. For non-domestic use only. Units supplied without plugs.

American, French, Italian and Schuko sockets are available on request.

Plugs

Plug type A (part number 41) are available in White (W), Black (B) and Red (R).
Type B (part number 42) are available in White (W), Black (B) and Red (R).

SHAVER SUPPLY UNIT

Shaver supply units are dual voltage: 115 – 230V output, designed to BSEN61558 and will accept UK, European, USA and Australian shaver plugs. Interiors are available in White (W) or Black (B). Flush boxes are to be metal boxes to BS4662 minimum 49mm deep.

45AMP DOUBLE POLE SWITCH

The A0234/A0934/A0434 and A0237/A0937/A0437 45Amp double pole cooker switch complies with BSEN 60669-1:2000. The units will be supplied with a black or white rocker to best compliment the chosen plate finish. All units come complete with amber neon indicator. Flush boxes are to be metal boxes to BS4662 minimum 49mm deep.

FUSED CONNECTION UNITS

Switched fused connection units have a double pole switch that has a 3mm contact gap for isolation. The units have a retained fuse carrier that is not removed during fuse replacement. Patent 2186447. The fused connection unit complies with BS1363: Part 4.

FAN ISOLATOR SWITCH

The 3 pole 10Amp Fan isolator unit complies with BSEN 60947-2. Interiors are available in Black (B), Bright Chrome (BC), Polished Brass (PB), Satin Chrome (SC) and White (W).

MODULAR INTERIORS & EURO MODS

BT Telephone Master (PSTN)

Conforms to BS EN 41003 and BS 6312 Part 2. The BT Master is used to act as the separation point between domestic telephone installations to service providers. It incorporates a bell capacitor, resistor and voltage surge protection.

Part Numbers include:

Modular Interiors:	3706011-white	3706012-black
Euromods:	3606101-white	3606102-black (25mmx50mm)

BT Telephone Secondary

Conforms to BS EN 41003 and BS 6312 Part 2. The BT Secondary is commonly used to increase the number of telephone sockets in any given environment. Wired directly from a BT NTE5 Master. Maximum of 4 secondary's to 1 master.

Part Numbers include:

Modular Interiors:	3706013-white	3706014-black
Euromods:	3606103-white	3606104-black (25mmx50mm)

Cat 5e RJ45

Conforms to IEC 11801 and TIA/EIA 568C.2. The Cat 5e is a twisted pair that provides a performance of up to 100 MHz and is commonly used for various networked devices such as cable or DSL modems or Ethernet.

Part Numbers include:

Modular Interiors:	3706033-white	3706034-black
Euromods:	3606005-white	3606006-black (25mmx50mm)

CAT 6 UTP RJ45 and CAT 6 STP RJ45

Conforms to IEC 11801 and TIA/EIA 568C.2. The Cat 6, Cat 6 UTP and Cat 6 STP are capable of gigabit transmission and provides a performance of up to 250 MHz. Commonly used for networks between Home Routers, PC's and other networkable devices.

Part Numbers include:

Modular Interiors:	UTP 3706037-white	3706038-black,
	STP 3706039-white	3706040-black
Euromods:	UTP 3606025-white	3606026-black (25mmx50mm)
	STP 3606019-white	3606020-black (25mmx50mm)

Cat 6A STP RJ45

Conforms to IEC 11801 and TIA/EIA 568C.2. The Cat 6A STP is capable of gigabit transmission supporting 10Gbase-T over 100 metres. Provides up to 500 MHz; a higher performance than Cat6 and uses 4-pair twisted cable, typically uses a RJ45 connectors.

Part Numbers include:

Modular Interiors:	3706039-white	3706040-black
Euromods:	3606021-white	3606022-black (25mmx50mm)

RJ12

Conforms to BS 6312 Part 2. 6 Pin 6 Connector RJ12 is commonly used for larger companies rather than households for the connection of telephone lines such as keyed telephone systems. Suited for direct connection to PSTN (Public Service Telephone Network). This can be used in a 6P4C or 6P2C configuration as per RJ11.

Part Numbers include:

Modular Interiors:	3706043-white	3706044-black
Euromods:	3606003-white	3606004-black

TV (IEC-169)

Conforms to BS EN 61169-2 and BS EN 50083-2. The TV Module uses an aerial socket to connect to European TV sets or FM/DAB radio receivers. Available in Male and Female IEC sockets suitable for Digital TV.

Part Numbers include:

Modular Interiors:	3706051-white	3706052-black
Euromods:	3606413-white	3606414-black (IEC Female unshielded) 25mmx50mm
	3606415-white	3606416-black (IEC Male unshielded) 25mmx50mm
	3606201-white	3606202-black (IEC Female shielded) 25mmx50mm

Satellite 'F' Connector

Conforms to BS EN 61169-24 and BS EN 50083-2. The 'F' Type Satellite connector can be used for Terrestrial TV, Cable TV, Satellite TV and Cable Modems. Requires UHF (MATV) television distribution.

Part Numbers include:

Modular Interiors:	3706053-white	3706054-black (Single)
	3706081-white	3706082-black (Twin)
Euromods:	3606203 white	3606204-black (Single, 25mmx50mm)

MODULAR INTERIORS & EUROMODS CONTINUED

HDMI Outlet

The HDMI outlet is a female jack supporting a High Definition Multimedia Interface with devices such as gaming consoles and camcorders. Capable of transmitting audio and video data.

Part Numbers include:

Modular Interiors:	3706057-white	3706058-black
Euromods:	3606205-white	3606206 black (25mmx50mm)

Speaker Outlet

Conforms to BS 60728-11. The Speaker module uses a 4mm banana connector allowing connections between a hi-fi systems amplifier to loudspeakers. Gold plated connections.

Part Numbers include:

Modular Interiors:	3706091 white	3706092-black
Euromods:	3606207-white	3606208-black (25mmx50mm)

SVGA

The SVGA outlet provides a greater resolution than VGA and is commonly used for connections of computer monitors and high definition televisions. Supports 800 x 600 resolutions.

Part Numbers include:

Modular Interiors:	3706065-white	3706066-black
--------------------	---------------	---------------

3.5mm Audio

The female 3.5mm Audio connector can be used for home cinema and digital stereo hi-fi systems.

Part Numbers include:

Modular Interiors:	3706073-white	3706074-black
Euromods:	3606221-white	3606222-black (25mmx50mm)

Single, Twin, Triple RCA Phono

Conforms to BS 60728-11. The RCA provides gold plated phono outlets (black or white – single, red/black – twin, red/black/yellow - triple) to carry audio and video signals from a portable device to an output device such as a TV. Typically used for stereo audio input connections (75 Ohm). Supports a bandwidth of 0-100MHz.

Part Numbers include:

Modular Interiors:	3706061-white	3706062-black (Twin Red/Black)
Euromods:	3606215-white	3606216-black (Single 25mmx50mm)
	3606213-white	3606214 black (Twin-Red/Black- 25mmx50mm)
	3606209-white	3606210-black (Triple RGB Red/Green/Blue25mmx50mm)

Diplexer

Diplexer modules are for connecting a single co-axial aerial down lead carrying combined TV and FM signals. The filtering in the diplexer splits out the appropriate signal and feeds it to the relevant output connection.

Part Numbers include:

Euromods:		
TV/RADIO	3604603-white	3604604-black (50mmx50mm)
TV/SAT	3604601-white	3604602-black (50mmx50mm)

Triplexer

Triplexer modules are for connecting a single co-axial aerial down lead carrying combined TV, FM and SAT signals. The filtering in the triplexer splits out the appropriate signal and feeds it to the relevant output connection.

Part Numbers include:

Euromods:		
TV/RADIO/SAT	3604605-white	3604606-black (50mmx50mm)

Quad

The quad outlet contains a triplexer together with a separate satellite output, for use with Sky+ or more interactive TV applications.

Part Numbers include:

Euromods:		
TV/RADIO/SAT/SAT2	3604607-white	3604608-black (50mmx50mm)

SWITCH INTERIORS
